Reduce your company's energy bills and lower your carbon footprint with the eAnalyser energy monitor.

- ✓ eAnalyser displays the individual energy usage of each electrical appliance around the workplace.
- ✓ You will be able to see every change in power consumption through our easy to read graphical display; from flicking on the kettle to the air conditioning turning on.
- ✓ eAnalyser also plugs into the mains allowing you to view the complete power consumption for an entire building.
- ✓ Identify electricity wastage and identify where to save money.

See our website for more information and start saving **NOW!**
